

Centennial Jingzhang

Diameter Intelligence Axis

Diameter AI Innovation Belt

Urban Design Proposal · v5.10

One Diameter · Three Cores · Two Rings · Multiple Courts

World-class AI Innovation Ecosystem · Modern People-Oriented City Demonstration Belt

Submitter: PKU-FranklinWang | Open Co-Creation Concept Proposal

■ PROVISIONAL — Conceptual Proposal for Discussion Only

Executive Summary

Vision & Positioning

Guided by the causal chain of New Spatial Economics — "spatial quality enhancement → dynamic talent agglomeration → industrial innovation development" — as its theoretical mainline, this proposal presents the "Diameter" spatial economic paradigm.

Taking the Jing-Zhang Railway Heritage Park as a carrier, it forms an AI innovation central axis that stands in east-west symmetry with Beijing's traditional central axis, building a spatial structure of "One Diameter · Three Cores · Two Rings · Multiple Courts".

Aim: Create a world-class AI innovation ecosystem and a modern people-oriented city demonstration belt.

Key Figures & Scope

43.6 km²
Coordinated Study Scope

11.4 km²
Overall Design Scope

368.4 ha
Key Areas

9 km
Innovation Diameter Length

¥300 billion
AI Core Industry (2030)

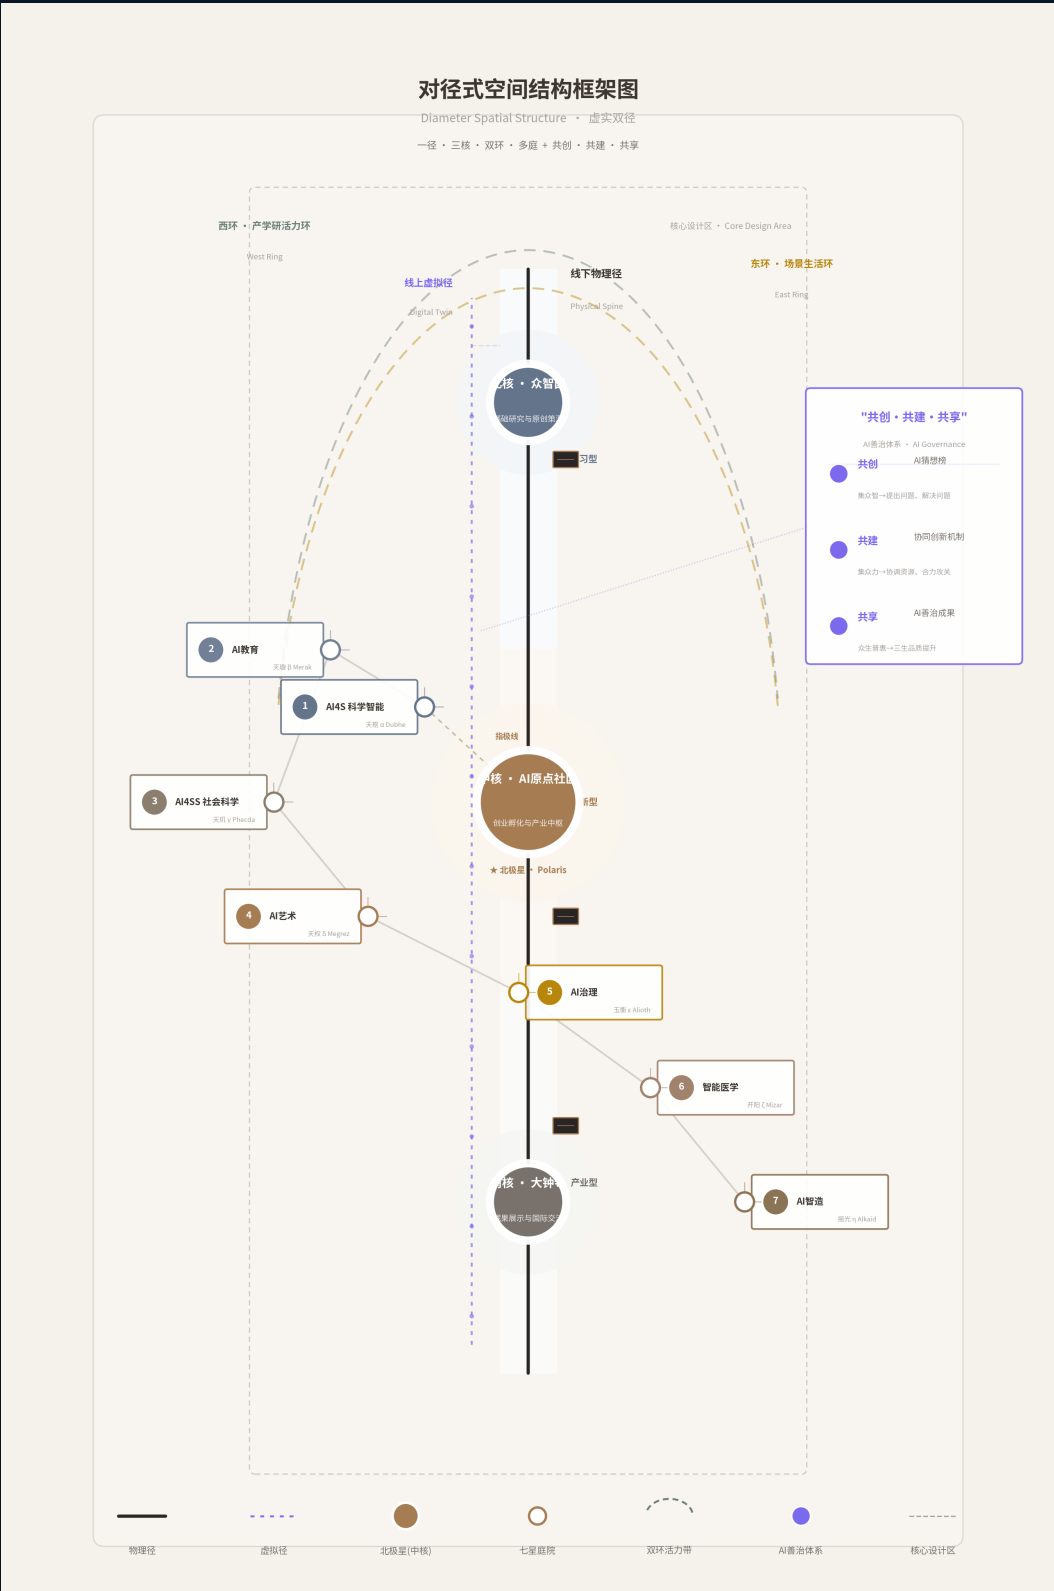

500,000
High-End Talent Target

~35%
Blue-Green Space Ratio

90%+
15-min City Coverage

North: North 5th Ring Road | South: Xizhimen
West: Zhongguancun Street | East: Beijing-Tibet Expressway

Spatial Structure — One Diameter · Three Cores

Structure Composition

■ One Diameter

9km Jingzhang Railway Heritage as innovation spine, north-south quality gradient

■ Three Cores

North Core (Basic Research), Main Core (Startup Incubation), South Core (Industrial Transformation)

■ Two Rings

North Ecological Ring (Tsinghua-PKU-Yuanmingyuan), South Ecological Ring (Zizhuyuan-Zoo-Jishuitan)

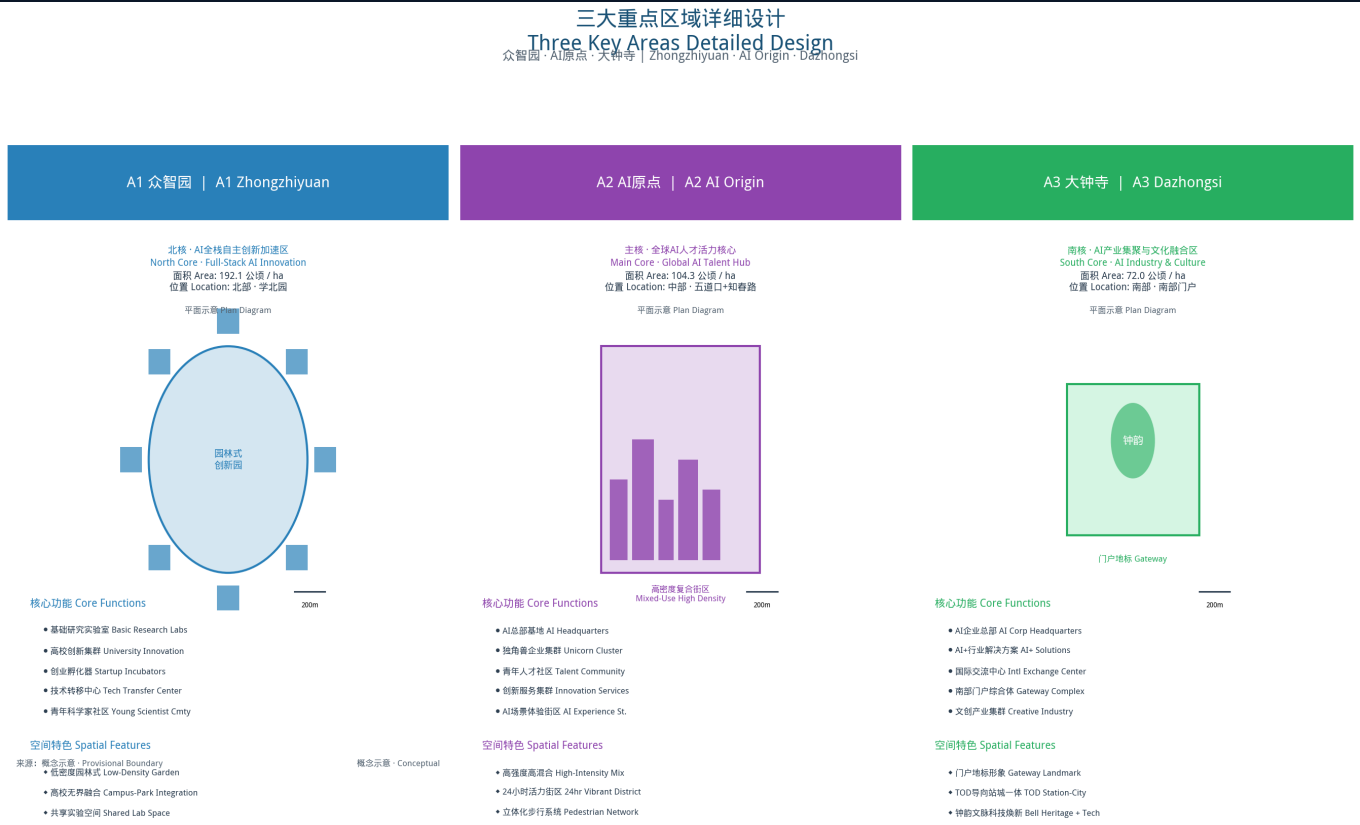

■ Multiple Courts

Shared courtyards and pocket parks distributed in each district

■ Seven AI Nodes

Seven characteristic AI scenario nodes along the diameter (Seven-Star Archipelago imagery)

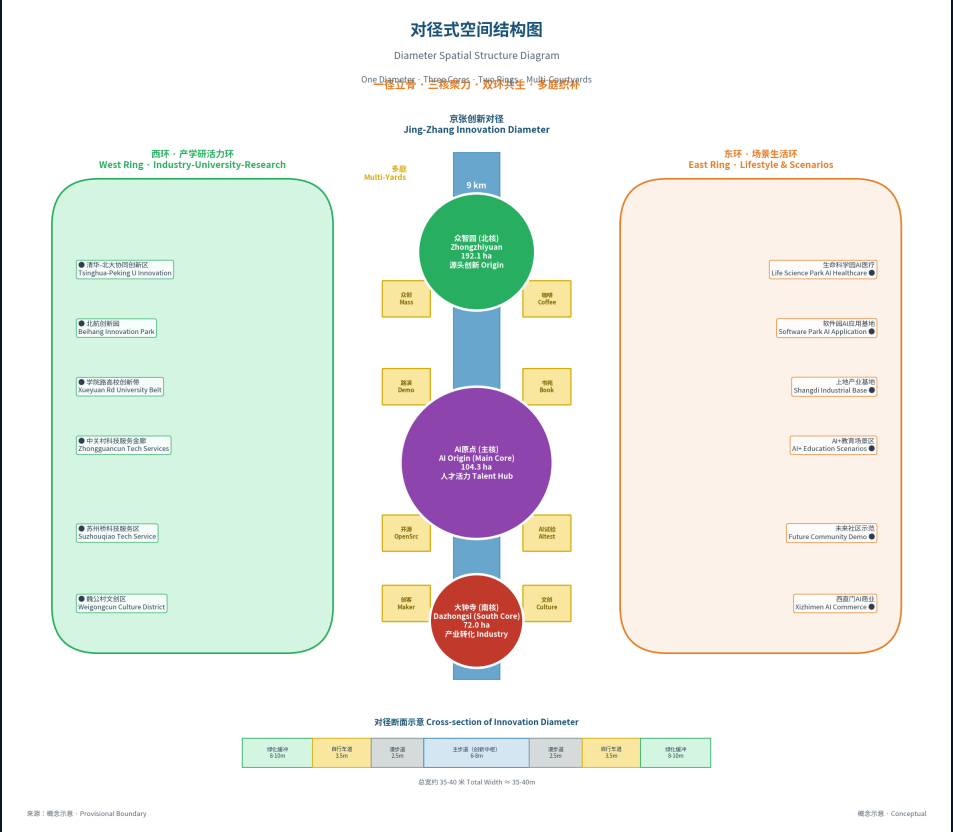

Key Areas — Three Cores Linked · Nine Districts

Nine Characteristic Districts

- **North 5th Ring · Collective Intelligence Park**
AI for Science · Basic Research Source
- **Xueyuan Road Knowledge Innovation Belt**
University-Local Integration · Knowledge Spillover
- **AI Origin · Zhongguancun**
AI Headquarters Cluster · Innovation Exchange
- **Wudaokou International Innovation**
Youth Entrepreneurship · Global Maker Community
- **Dazhongsi · Smart Living**
AI+ Lifestyle · Future Living Prototype
- **Xizhimen Transport Hub**
TOD Development · Gateway Image
- **Jingzhang Heritage Park (South)**
Cultural Heritage · Creative Industries
- **AI Origin Core Renewal**
Urban Renewal · Existing Space Upgrade
- **Dazhongsi Commercial Revitalization**
Experience Economy · Lifestyle District

Land Use & Transportation

Nine Functional Zones

Transport & Slow-Traffic System

Rail Transit

Lines 13, 4, 10, Changping — 800m coverage >90%, infill stations

Slow-Traffic System

9km continuous main corridor along heritage, barrier-free network

Road Traffic

Optimized arterial structure, increased local street density, traffic calming

Static Traffic

Smart parking, shared parking, P+R facilities, multi-story garages

Intelligent Connected

ICV test roads, V2X infrastructure, MaaS platform

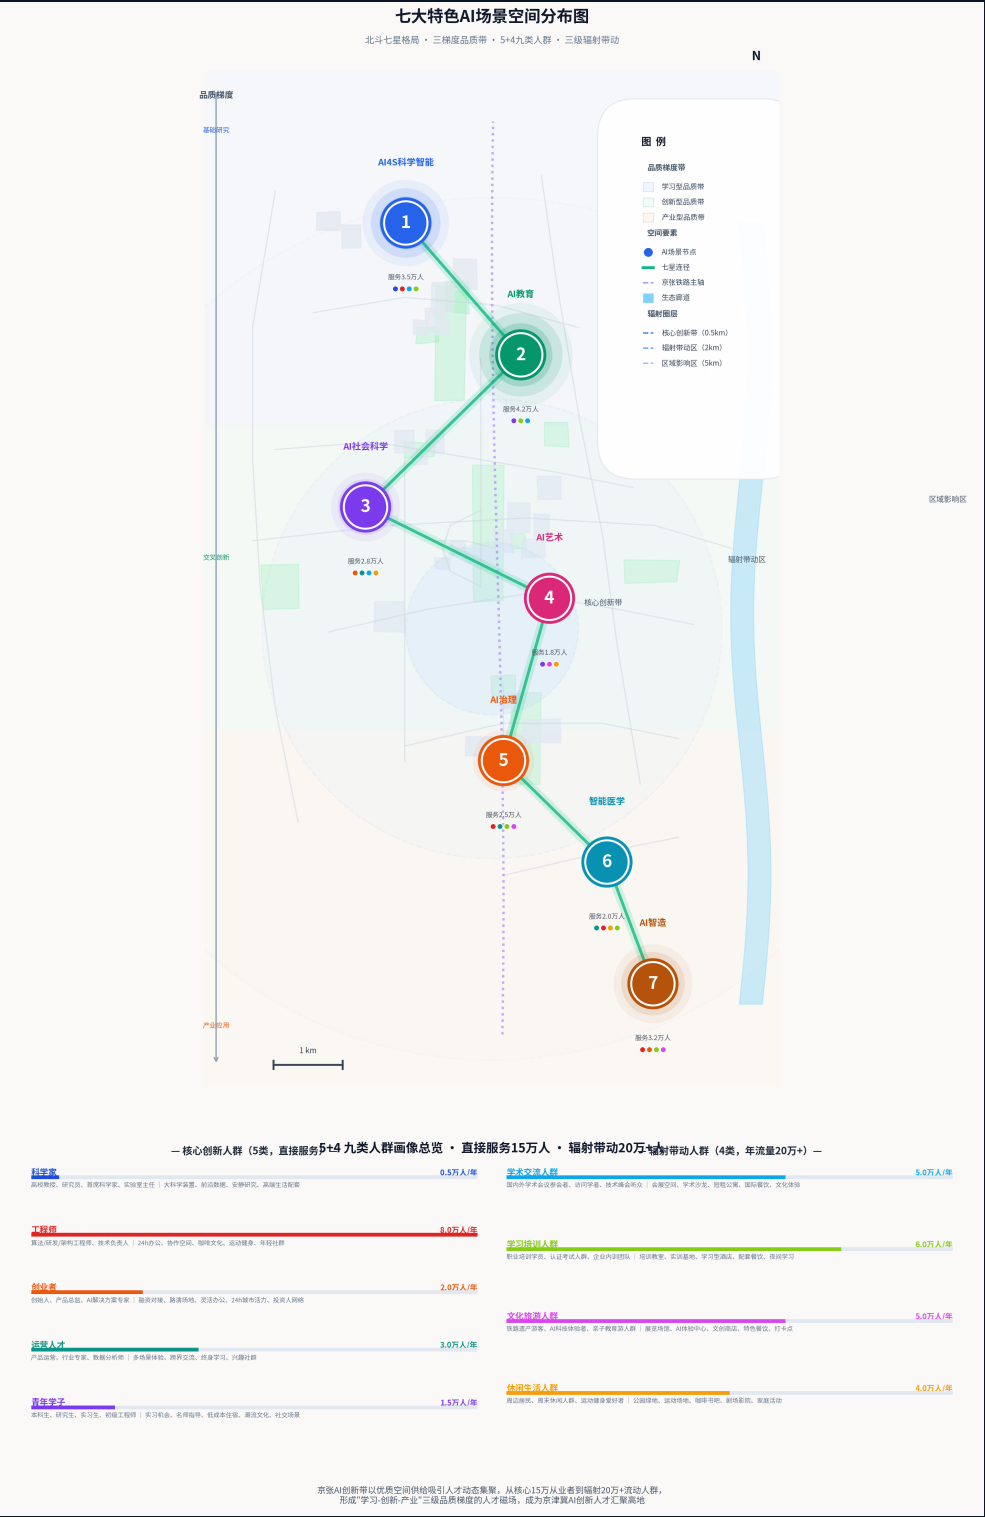

Walkability

Sheltered walkways, smart signage, 15-minute city walking network

Green Mobility

Target >70% green travel mode share

AI-Enabled Scenarios

12+ AI Application Scenarios

- Research Innovation
AI4S labs, computing centers, data platforms
- Smart Transport
AI signals, AV test roads, smart parking
- Smart Community
Smart concierge, unmanned retail, 24h services
- Smart Education
Personalized learning, AI mentors, lifelong learning
- Smart Healthcare
AI diagnosis, telemedicine, drug discovery
- FinTech
Intelligent advisory, risk control, quant investment
- Public Art
Interactive installations, digital heritage, AI workshops
- Creative Design
AIGC workshops, metaverse, digital art
- Ecological Env.
AI monitoring, biodiversity ID, carbon accounting
- Smart Energy
Smart grid, demand response, green power direct supply
- Urban Governance
CIM, city brain, intelligent security
- Unmanned Delivery
Last-mile robots, dedicated lanes, parcel lockers

Design Strategies

Blue-Green System

- One corridor: 9km heritage park
- Two rings: north-south ecological
- Multiple courts: shared courtyards
- Sponge city & water system restoration
- 5-min green / 10-min park / 15-min heritage

Architecture & Form

- "Low-high-low" skyline rhythm
- Modern minimalist + industrial heritage
- 3-star green building standard
- Preserve-renovate-demolish strategy
- Active street frontages + setback terraces

Heritage & Culture

- Jingzhang Railway heritage protection
- Adaptive reuse of industrial buildings
- Cultural exhibition & creative offices
- Public art corridor & digital heritage
- Historic view corridor protection

Smart Infrastructure

- Urban sensing network & smart poles
- Green energy + storage + microgrid
- BIPV & distributed energy stations
- CIM platform & city brain
- New-type infrastructure land allocation

Implementation & Disclaimers

First Batch of Key Renewal Projects

- Jingzhang Railway Heritage Park (Southern Section)
- AI Origin Core Area Urban Renewal
- Dazhongsi Commercial District Revitalization
- Xizhimen Transport Hub TOD Development
- Wudaokou Youth Entrepreneurship Community
- Xueyuan Road Streetscape Renovation
- Smart Municipal Infrastructure Construction
- Talent Housing & Community Amenities
- Green Energy & Microgrid Demonstration
- AI Scenario Pilot Application
- Industrial Heritage Adaptive Reuse
- Public Space Network Enhancement

■ Provisional & Conceptual

This proposal is an open co-creation conceptual proposal for discussion only.

- All boundaries, areas, and land use are provisional
- Metrics are conceptual estimates based on public data
- Does not constitute statutory planning basis
- Does not confirm land ownership rights
- Implementation subject to approval procedures
- AI scenarios are conceptual visions
- Final subject to planning authority approval
